

Hunter®

RESIDENTIAL & COMMERCIAL IRRIGATION
Built on Innovation®

- 01 Solar Sync dial position:** Makes it easy to add EPA WaterSense® smart control
- 02 Flexible design:** Modular model offers 4-16 stations, or choose fixed 6 or 12 station models
- 03 Remote compatibility:** Add Hunter ROAM remotes for ease of use

PRO-C® LIGHT COMMERCIAL & RESIDENTIAL CONTROLLER

Since 2001, the Pro-C has been the contractor's choice in residential irrigation control. The Pro-C has proven to be the most reliable and robust controller in the industry, with the flexibility to expand on demand due to its modular design. When expansion isn't necessary, the fixed 6 and 12 station models offer affordability in a high-end residential controller.

Now, the Pro-C will easily accommodate Hunter's Solar Sync® without additional wiring. The new Solar Sync dial position makes it easy to upgrade and program any Pro-C to smart control. The Hunter Solar Sync calculates evapotranspiration (ET) and adjusts Hunter controllers daily based on local weather conditions, resulting in water savings and conservation.

The Pro-C and all AC powered Hunter controllers are now EPA WaterSense labeled when paired with the Solar Sync weather sensor.
